Grad No. 1 – the rechargeable wine cooler

Temperature is critical for serving wine. If too cold, it can lose natural flavors; too warm, it develops unpleasant tastes and smells. Serving wine at its ideal temperature elevates the overall experience, allowing each bottle to express its full character.

Grad ensures your wine is always served at the perfect temperature, maintaining its integrity from bottle to glass. In settings where consistency and precision matter, this cooler helps deliver a flawless tasting experience.

Elevate both wine and brand

Grad helps elevate your establishment by ensuring wine is always perfectly tempered, enhancing customer satisfaction and reinforcing your brand's values. **It's more than just a wine cooler — it's a reflection of style, quality, and service.**

Whether in a restaurant, bar, or event setting, Grad adds a touch of sophistication while supporting a seamless and memorable experience.

Product Technology

- Advanced top-optimized cooling
- Patented heat dissipation system for uninterrupted airflow
- Chamber temperature distribution
- Adaptive sensor and temperature control algorithm
- Ultra silent solid state thermoelectric cooling system
- High-quality steel chassis and aluminium cooling chamber
- Li-ion battery
- Touch interface with continuous temperature feedback
- Auto-adjust display brightness
- Easy charging stand

Performance

- Keeps dedicated temperature: 5–20°C (41–68°F)
- Tolerated air temperature: 20°C (68°F)
- Recharge time: 2 hours (50Wh)
- Power consumption at 5°C (41°F): 15W

Specifications

- Weight: 2.6 kg (7.37 pounds)
- Height: 33.5 cm (13.19 inches)
- Max bottle diameter: 10 cm (3.94 inches)
- Max power consumption during cooldown: 25 W
- Warranty: 2-year limited warranty
